Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Drawings Objection

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the design as cited in claim 7 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Objection

Claims 1-9 are objected to because of the following informalities: In claim 1, line 1, "devise" should read --device--. Appropriate correction is required.

Claims Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(1) In claim 1, "the knife blade" has no clear antecedent basis.

(2) In claim 8, line 2, "central hinge" should read --the central hinge-- since it refers to the one previously cited.

Claims Rejection – 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Berglof et al. (U.S. Patent No.5,682,653).

The device of Berglof et al. comprises two magnetically charged faces (i.e. magnets 16,17) and a magnet support (i.e. plastic shrink tubing 13) with a central hinge (13A) as claimed.

The statement of intended use (i.e. for securing knives) adds no structure to and is of no patentably import in the claimed device.

Claim Rejection – 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berglof et al. (U.S. Patent No.5,682,653).

The device of Berglof et al. shows all the claimed structure except it lacks a design affixed to the exterior surface of the magnet support (13).

However, the claimed design is not patentably distinct over Berglof et al. Since the design (indicia, logo or any advisement, etc.) on the magnet support depends more upon the choice of manufacturer than on any inventive concept.

Prior Art Citations

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bourgein, Esposito, Chase et al., Krapf and Baraky et al. are cited as art of interest.
